Submissions and acceptances

- There were 167 submissions at the submission deadline.
- 3 submissions were withdrawn, including 2 that were invited by the SC independent of the PC's selection process.
- 33 talks were selected for presentation, including 2 talks that were each a merger of 2 submissions. (The quality of the submissions was very high, and the PC was forced to make difficult decisions.)
- 9 accepted talks were chosen as featured talks.
- 3 additional talk submissions were suggested to the SC for invited talks. (The SC agreed and all 3 invitations were accepted.)
- There were 170 poster submissions, 150* of which were accepted.

* It was with deep regrets that 20 poster submissions, most of which would normally have been accepted, were rejected because of concerns about space.
