

Program Committee Report

QIP'19

Matthias Christandl, Chair of PC

University of Copenhagen, Denmark

QIP Charter on PC (see website)

- The role of the Program Committee (PC) is to select the best submitted papers and to put together a programme for the next QIP. The PC chair chooses the members of the PC (helped by advice from the SC), typically 15 or more people representing the broad range of subfields, including both computer science and physics. The PC chair determines (in cooperation with the SC) the rules for submission and puts out a call for submissions. The selection of talks among the submitted papers is competitive, with typically between 40 and 60 accepted submissions; it is recommended to keep the number of acceptances minimal but the PC has flexibility to accommodate exceptional breadth and quality of submissions in a given year. The PC can designate a few of the best submissions as “plenary” talks (given by “plenary speakers”), which are assigned more time in the program than regular contributed talks (given by “regular speakers”). All regular contributed talks are given in time slots ranging from 20-40 minutes.
- Poster submissions will generally be accepted unless they are off-topic or clearly wrong, to enable people to obtain funds for travel. At the discretion of the PC, best poster prizes can be awarded.

Program Committee QIP 2019

Acín, Antonio (ICFO)

Bausch, Johannes (University of Cambridge)

Briët, Jop (CWI)

Childs, Andrew (University of Maryland)

Chiribella, Giulio (University of Hong Kong and University of Oxford)

Christandl, Matthias (University of Copenhagen; Chair)

Cleve, Richard (University of Waterloo, Vice-Chair)

Crosson, Elizabeth (University of New Mexico)

del Rio, Lúcia (ETH Zurich)

Dupuis, Frédéric (CNRS, LORIA, Université de Lorraine)

Fawzi, Omar (ENS Lyon)

Flammia, Steve (University of Sydney)

Garcia-Patron, Raul (Université Libre de Bruxelles)

Gosset, David (University of Waterloo)

Haah, Jeongwan (Microsoft Research)

Hastings, Matt (Microsoft Research)

Jeffery, Stacey (QuSoft, CWI)

Kashefi, Elham (University of Edinburgh and CNRS, Sorbonne universite)

Kerenidis, Iordanis (CNRS, Université Paris Diderot)

König, Robert (Technical University of Munich)

Kothari, Robin (Microsoft Research)

Lancien, Cecilia (Université Paul Sabatier Toulouse)

Le Gall, Francois (Kyoto University)

Lee, Troy (University of Technology Sydney)

Li, Ke (Harbin Institute of Technology)

Liu, Yi-Kai (NIST/University of Maryland)

Pastawski, Fernando (Psi Quantum)

Pérez-García, David (Universidad Complutense de Madrid)

Reichardt, Ben (USC)

Reyes, Joseph (ETH Zurich)

Schuch, Norbert (Max-Planck-Institute of Quantum Optics, Munich)

Svore, Krysta (Microsoft Research)

van Dam, Wim (University of California, Santa Barbara)

Winter, Andreas (Universitat Autònoma de Barcelona)

Yung, Man-hong (Southern University of Science and Technology)

Submissions

- Talks
 - 349 talk-only or talk-or-poster submissions
 - 63 submissions accepted, resulting in acceptance rate of 18%
 - 6 of which merged in pairs, resulting in 60 talks
 - 5 of which upgrade to plenary
 - 1 of which also best student paper award
- Posters
 - ca 325 poster (from poster-only and talk-or-poster submissions),
 - 100% accepted

Reviewing

- Electronic system Easychair
- PC members declare Conflict of Interests. Conflicts of Chair handled by Vice-Chair
- Every paper is reviewed 3 times, resulting in a total of >1000 reviews, each PC member in charge of 31 papers
- Selection process in several stages involving scoring, championing and voting rounds, additional voting on plenary and best paper award
- The process is not perfect and decisions are subjective. We have done our best to be fair.

Discussion

- What should be the format of next years conference?
 - #submissions QIP'17 (197), QIP'18 (296), QIP'19 (349)
 - Should we have more/fewer talks? (Plenary, invited, contributed)
 - “Conference has become lottery”, “Reviewing too harsh”, “Single-track is nicer”
 - Is the purpose of QIP to distribute credit or to have a fun program?
- PC perspective
 - Works well
 - Keep format similar
 - Quality of submissions warrants a mild increase in #talks without sacrifice in quality (increase from 60 to 70-75 talks)
 - Keep it double track, but decrease talk length from 30+questions to 20 or 25min+questions to accommodate the additional talks
 - Resurrect the free afternoon 😊

Thanks for attending, submitting, presenting talks and posters!
I hope you enjoy the talks & posters!
See you at QIP 2020
