Program Committee

PC size

QIP 2019: 35

QIP 2020: 35

QIP 2021: 35

QIP 2022: 60

Talk submissions

QIP 2019: 349

QIP 2020: 296

QIP 2021: 462

QIP 2022: 514

2 reviews per paper

3 reviews again

Reviewing process. Facts and numbers

- Two tracks on EasyChair: talk and poster
- Explicit COIs rules at submission
- PC chairs did not submit any paper
(thanks to our coauthors for their understanding)
- 514 talk submissions
- 3 reviews per paper. A total of 1550 reviews
- Acceptance rate: 22%
(24%, 28%, 18% in previous years)
- 151 poster submissions. All accepted.

Talks

Submissions	514
Accepted	113
Acceptance rate	0,22
Reviews	1550
External reviewers	419
External reviews	674

reviews for a paper	number of papers
2	14
3	479
4	20
5	1

Reviewing process. Phases

- **Target number of accepted talks**

- 3 plenaries, 10 short plenaries, 93 regular talks in 3 parallel tracks. Goal: keep >20% acceptance rate
- Proposed by SC + local organizers in coordination with PC chairs.

- **Bidding phase.**

- PC members declare COIs.
- Assign each paper to 3 PC members in an optimal way (topic-wise).
- Detect related submissions to assign a common reviewer → Fair comparison in discussion phase

- **Reviewing phase.**

- Each paper gets 3 reviews + 3 scores
- PC members could use subreviewers for help. Scores given by PC members

- **Discussion phase.**

- Intensive discussion for each paper and comparing papers via EasyChair.
 - More than 2000 comments.
 - More than 800 revised reviews.
- 82 talks are selected by consensus during this phase. 63 submissions pass to the next round.

- **Voting phase.**

- Two round voting to select the remaining 24 talks.
- Plenaries, short-plenaries and best student paper award selected by voting.

Reviewing process. Comments

- Final decisions were sent to authors together with the reviews.
- Despite our efforts (e.g. common reviewers in related submissions, intensive discussions), the process is inherently imperfect and subjective (60 PC members deciding in 8 weeks on more than 500 submissions, using more than 1500 reviews).
- Numbers (submissions, PC size) at the edge of what we find manageable.
 - Impossible without co-Chair.
 - Maybe future QIPs require to be multi-track?
 - Other solutions?
- 20% acceptance hard to maintain in the future if number of submissions keep growing. A debate seems needed in this direction.

To conclude

Our warmest thanks to the local organizing committee, and very specially to Thomas Vidick
