University
of

Munich Center
for Quantum
Science and

- report from the SC/LOC chair
- QIP 2022 (Thomas Vidick)
- QIP 2023 and 2024 bids (Min-Hsiu Hsieh and Iman Marvian)
- report from the PC chair (Barbara Terhal)
 - QIP 2021 best paper award announcement
 - QIP submission statistics/PC work
- items to be discussed:
 - review process
 - QIP format
 - QIP society?
 - other items?

Steering committee of QIP 2021 - THANK YOU!

Elizabeth Crosson | University of New Mexico
Toby Cubitt | University College London
Nilanjana Datta | University of Cambridge
Steve Flammia | AWS Center for Quantum Computing
Robert König | Technical University of Munich, Chair
Troy Lee | University of Technology Sydney
Laura Mančinska | University of Copenhagen
John Smolin | IBM Research
Bei Zeng | Hong Kong University of Science and Technology

München, 8. February 2019

Letter of support for the application of TUM hosting QIP 2021 in Munich

Dear QIP Steering Committee,

With this letter we express our support for the application of Michael Wolf and Robert König from the Technical University of Munich (TUM) to organize the **Conference on Quantum Information Processing** in March 2021 in Munich. We commit to assist the local organizers in planning and hosting the event and will provide personal as well as financial support.

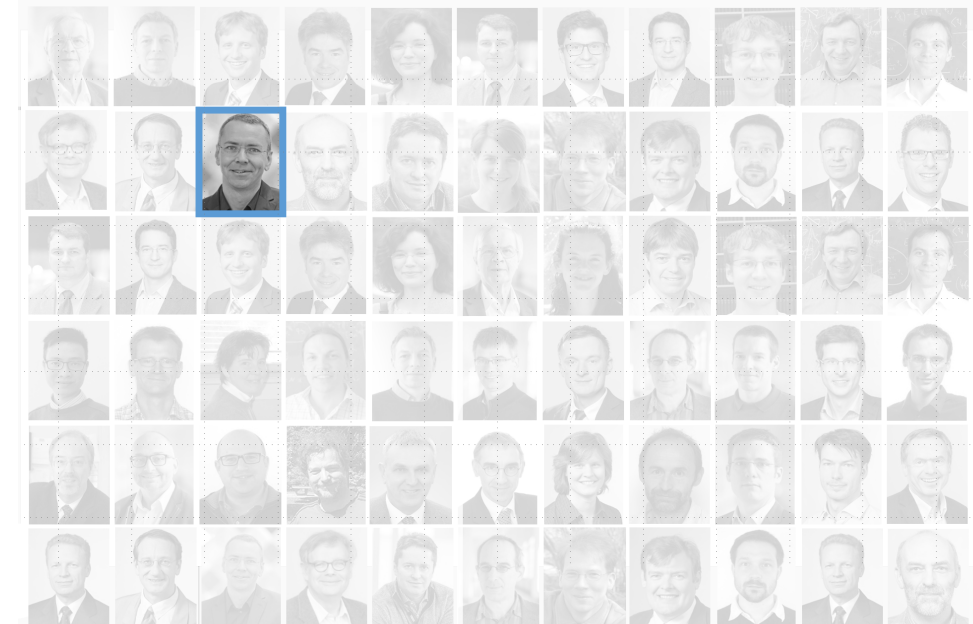

The Munich Center for Quantum Science and Technology (MCQST) is a new Cluster of Excellence funded by the Deutsche Forschungsgemeinschaft (DFG, German Research Foundation). It unites more than 50 research groups from physics, mathematics, chemistry and engineering, all working in the field of quantum science and technology. Bringing QIP to Munich would allow many of our members to participate in this excellent conference. Moreover, it would stimulate collaborations between scientists coming to QIP from all over the world and Munich researchers.

We would be very happy and honoured to support the local organizers in hosting the QIP conference in March 2021.

With kind regards,

Immanuel Bloch

Munich Center for Quantum Science and Technology

A special thank you to everyone at the MCQST office for their *extreme* dedication to making QIP 2021 a success!

- items to be discussed:
 - review process
 - QIP format
 - QIP society?
 - other items?

A QIP society?

advantages:

- less dependence on university/industry/national policies
- easier coordination across years/locations
- reduced financial risk to local organizers

disadvantages:

- membership fees?
- setup unclear (subcommunity of APS, IEEE, IOP?)

Please discuss!

Please give feedback

Any feedback (also post-conference) will be greatly appreciated.

Please write to office.qip2021@mcqst.de

Also, you may receive a survey – if so, please respond – thank you!
